Thanks Gino for pointing out the OPPT briefing schedule for Tuesday, 9/10. I, Stan and Mark will be at the 1-BP SACC meeting.

A couple of comments:

1. I notice the tick tick list does not include the milestones for completion and publication of PV-29, 1,4-dioxane and HBCD. The master schedule specifies December 20 as the date of publication for PV-29, 1,4-dioxane and HBCD. Considering the holiday schedules, people's use or lose leave, and steps to finalize the risk evaluations, I think it will be challenging and perhaps not possible we can finalize and publish the 1,4-dioxane and HBCD REs by December 20 (as shown in the Master schedule).
2. Regarding the SACC peer review meeting time for TCE and PERC (week of Jan. 6 or Jan. 13, 2020), I think it is better schedule-wise to have it earlier although I recommend we schedule the peer review meeting the week of Jan 13. Some of the team members have use or lose and may be out through Jan. 3.

Stan – made some small changes to Tick Tock....one issue – TCE team scheduled RAD Mgmt briefing on 9/10 (first day of SACC) as opposed to 9/9 (what is on Tick Tock).

Changes I made – added OGC to OPPT/OCSP review and clarified a couple of asbestos and CCL4 bullets....

All in track changes....

We have made revisions and still need input from OSCP on virtual meetings and January peer review.
